Mød et Grønland, du ikke kender!

Med Grønlands Selvstyre som arrangør sætter udstillingen In the Eye of Climate Change fokus på klimaforandringerne udfordringer til Grønland. Udfordringer, der både handler om klimaansvarlighed og industriel udvikling, om vandkraftværker og energiintensiv industri, om solenergi, grøn it, nye muligheder for at udvinde olie og mineraler, kulturelle forandringer, forskning og meget andet. Det hele krydres med film, oplæg og events af forskellig slags.

Greenland as you've never seen it!

Arranged by the Government of Greenland the exhibition In the Eye of Climate Change focuses on the challenges that Greenland faces concerning climate change. These challenges deal with climate responsibility and industrial development, with hydroelectric power stations and energy intensive industry, with solar energy, green it, with new possibilities concerning the extraction of oil and minerals, with cultural changes, research and much more. The programme will be seasoned with films, presentations and events of various kinds.
